Mumbai, India

PROFESSIONAL SUMMARY

Senior Frontend Engineer with **6+ years of industry experience** building scalable, production-grade web applications and **data-intensive dashboards** using React and modern JavaScript. Strong expertise in component architecture, state management, and performance optimization. Currently leading frontend initiatives at Jio Platforms with a focus on frontend architecture, code quality, maintainability, and translating complex product and data requirements into reliable, production-ready interfaces.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), React.js, Redux, HTML5, CSS3
Frontend Concepts: Component Architecture, Design Systems, React Hooks, Data-Driven UI
Data & Analytics: Dashboards, A/B Testing, Experimentation, Data Visualization
APIs & Tools: REST APIs, Git, Azure DevOps, Chrome DevTools, Chrome Extension APIs
Practices: Code Reviews, Performance Optimization, Agile Development

PROFESSIONAL EXPERIENCE

- | | |
|---|---|
| Senior Software Development Engineer
<i>Jio Platforms Limited</i> | Dec 2023 – Present
<i>Navi Mumbai, India</i> |
| <ul style="list-style-type: none">Led frontend development for an A/B testing and personalization platform, delivering data-driven UIs for segmentation, experiments, dashboards, customer profiles, catalogs, and admin workflowsDesigned and built analytics dashboards with date-range filters, KPIs, highlights, and interactive charts to visualize experiment and user behavior dataOwned frontend architecture for complex, state-heavy modules, driving scalability, performance optimization, and long-term maintainabilityProvided technical leadership through code reviews, task breakdowns, mentoring junior engineers, and close collaboration with backend, QA, and product teams to deliver stable production releases | |
| Software Development Engineer
<i>Jio Platforms Limited</i> | Sept 2020 – Nov 2023
<i>Navi Mumbai, India</i> |
| <ul style="list-style-type: none">Developed user-facing features using React and JavaScript based on Figma designs and detailed product requirements, collaborating closely with backend, QA, and product teamsBuilt and standardized reusable React components and shared utilities to reduce duplication and improve development velocity across multiple featuresRefactored legacy components to improve performance, readability, and long-term maintainability across multiple modules | |
| Graduate Engineer Trainee
<i>Jio Platforms Limited</i> | Aug 2019 – Aug 2020
<i>Navi Mumbai, India</i> |
| <ul style="list-style-type: none">Contributed to frontend development and QA efforts for large-scale applications including JioMart and MyJio, working with JavaScript and React-based systemsIdentified and reported 4+ blocker and 20+ critical issues during testing cycles, significantly improving release stability and product quality | |

SELECTED TECHNICAL CONTRIBUTIONS

- Consistently received **A+ performance ratings for five consecutive years** at Jio Platforms
- Led migration of a legacy frontend module to the organization's design system, improving UI consistency and usability by **30%**
- Built and standardized **12+ reusable**, design-system-compliant React components adopted across multiple modules, improving development efficiency and product usability by **50%**
- Developed a **WYSIWYG Chrome extension** for visual A/B testing and personalization, significantly reducing manual configuration effort and improving experiment creation speed

EDUCATION

University of Mumbai <i>Bachelor of Engineering in Computer Engineering</i>	Mumbai, India <i>Graduated 2019</i>
